

Amir has walked 18 kilometres and Dora has walked $12\frac{1}{2}$ miles.

Dora has not walked as far as Amir.

False

Dora has walked further than Amir.

$$10 \text{ miles} = 16 \text{ km}$$

$$5 \text{ miles} = 8 \text{ km}$$

$$2\frac{1}{2} \text{ miles} = 4 \text{ km}$$

$$12\frac{1}{2} \text{ miles} = 20 \text{ km}$$
