

Tommy has $4\frac{1}{2}$ litres of juice.

He drinks $\frac{7}{8}$ of a litre.

Ron

He has $3\frac{5}{8}$ litres left.

True

$4\frac{1}{2}$ can be partitioned into $3 + \frac{12}{8}$

$$3\frac{12}{8} - \frac{7}{8} = 3\frac{5}{8}$$
