

Shades of meaning

3. My final word is 'occasionally'.

Occasionally means 'sometimes but not often'. Write some sentences with the word occasionally in them.

Below is a bank of words and phrases in a cloud. You will also see a scale ranging from never-to-always to show how often something happens.

Pick a word from the cloud. Decide what it means and place it where it belongs on the never-to-always scale:

- Is it similar to 'never'?
- Is it a lot like 'always'?
- Does it mean something in the middle? If so, where will you place it?
- Can you think of any more words to add to the scale?
