

Rosie, Mo and Eva are painting a wall.

Rosie has painted $\frac{1}{5}$, Mo has painted $\frac{6}{20}$ and Eva has painted $\frac{4}{10}$

They have $\frac{1}{10}$ left to paint.

True

$$\frac{1}{5} + \frac{6}{20} + \frac{4}{10} + \frac{1}{10}$$

$$=\frac{2}{10}+\frac{3}{10}+\frac{4}{10}+\frac{1}{10}$$

$$=\frac{10}{10}$$
