

The Birth of the Industrial Revolution

Use the boxes below to note down two (or more!) reasons why each factor was important in the industrial revolution. When you have made notes, give each factor a number based on its importance in your opinion. Give the **most important** a '1' and order the rest down to '6', which is the **least important**.

Population Boom	Agriculture
Factories	Power
Transport	Empire

Now that you have chosen your order of importance, **explain** why you have made your choices for 1 and 6.
