

Egg Questions

	Q. There are 100 eggs in the nest, and 90 eggs hatch. What percentage of eggs hatch? <i>A. 90%</i>		Q. There are 120 eggs in the nest, and 14 do not hatch. How many eggs hatch? <i>A. 106</i>
	Q. There are 100 eggs in the nest, and 85 eggs hatch. What percentage of eggs hatch? <i>A. 85%</i>		Q. There are 90 eggs in the nest, and 8 do not hatch. How many eggs hatch? <i>A. 82</i>
	Q. There are 100 eggs in the nest, and 75 eggs hatch. What percentage of eggs do not hatch? <i>A. 25%</i>		Q. There are 110 eggs in the first clutch, and 90 eggs in the second clutch. How many eggs does the female lay altogether? <i>A. 200</i>
	Q. There are 100 eggs in the nest, and 90 eggs hatch. What percentage of eggs do not hatch? <i>A. 10%</i>		Q. There are 85 eggs in the first clutch, and 65 eggs in the second clutch. How many eggs does the female lay altogether? <i>A. 150</i>

Egg Questions

	Q. There are 103 eggs in the nest, and 10 do not hatch. How many eggs hatch? <i>A 93</i>		
	Q. There are 115 eggs in the nest, and 20 do not hatch. How many eggs hatch? <i>A 95</i>		
	Q. There are 115 eggs in the first clutch, and 110 eggs in the second clutch. How many eggs does the female lay altogether? <i>A. 225</i>		
	Q. There are 127 eggs in the first clutch, and 73 eggs in the second clutch. How many eggs does the female lay altogether? <i>A. 200</i>		

Egg Questions

	Q. There are 120 eggs in the nest, and 90 eggs hatch. What percentage of eggs hatch? A. 75%		Q. There are 100 eggs in the nest, and 85% survive. How many hatchlings will there be? A. 85
	Q. There are 120 eggs in the nest, and 96 eggs hatch. What percentage of eggs hatch? A. 80%		Q. There are 90 eggs in the nest, and 70% hatch. How many hatchlings will there be? A. 63
	Q. There are 80 eggs in the nest, and 56 eggs hatch. What percentage of eggs hatch? A. 70%		Q. There are 110 eggs in the nest, and 90% hatch. How many hatchlings will there be? A. 99
	Q. There are 120 eggs in the nest, and 80% survive. How many hatchlings will there be? A. 96		Q. There are 80 eggs in the nest, and 72 eggs hatch. What percentage of eggs hatch? A. 90%

Egg Questions

	Q. There are 125 eggs in the nest, and 85 eggs hatch. What percentage of eggs hatch? <i>A. 68%</i>		
	Q. There are 140 eggs in the nest, incubating at 33°C. If they all hatch, how many hatchlings will be male? <i>A. 0</i>		
	Q. There are 128 eggs in the nest, incubating at 29°C. If they all hatch, how many hatchlings will be female? <i>A. 49</i>		
	Q. There are 107 eggs in the nest, incubating at 33°C. If they all hatch, how many hatchlings will be female? <i>A. 101</i>		

Hatchling Questions

	Q. How did you break out of your egg? <i>A. Using your 'egg tooth'</i>		Q. How much parental care do adult turtles provide for their young? <i>A. None</i>
	Q. As a juvenile, what type of diet do you have? <i>A. Omnivorous</i>		Q. As a hatchling, do you look similar to your parents? <i>A. Yes</i>
	Q. Where do you, as a juvenile green turtle, go? <i>A. Nobody really knows!</i>		Q. As a hatchling, why would artificial light be a problem for you? <i>A. Because you would head towards the artificial lights instead of towards the sea</i>
	Q. Name one predator which might attack you on the beach. <i>A. Ghost crab or birds</i>		Q. How do you know which way you have to go to get to the sea? <i>A. The horizon over the sea is brighter than over land, and you head towards the brighter light</i>

Hatchling and Adult Questions

	Q. What size are you when you first hatch? <i>A. About 5 cm</i>		Q. If a green turtle is five years old, how many more years are there (at least) until it is able to reproduce? <i>A. Another 21 years</i>
	Q. At what temperature will half of the eggs in the nest be male, and half be female? <i>A. 29°C</i>		Q. Name one thing that could stop you from laying your eggs on the beach. <i>A. Bright lights and loud noises</i>
	Q. How many days are green turtle eggs usually incubated for? <i>A. Between 45 and 70 days</i>		Q. How many years are there between each of your breeding seasons if you are a female turtle? <i>A. Two to five years</i>
	Q. What does MPA stand for? <i>A. Marine Protected Area</i>		Q. How many clutches can you lay in one breeding season? <i>A. Up to nine clutches</i>

Adult Questions

 ARKIVE www.arkive.org © Masa Ushioda / SeaPics.com	Q. As a female turtle, how many eggs do you normally lay? <i>A. Between 100 and 150 eggs</i>	 ARKIVE www.arkive.org © Masa Ushioda / SeaPics.com	Q. Where are adult turtles normally found? <i>A. In shallower waters with lots of sea grass and algae</i>
 ARKIVE www.arkive.org © Masa Ushioda / SeaPics.com	Q. As an adult turtle, what do you eat? <i>A. Sea grass and algae</i>	 ARKIVE www.arkive.org © Masa Ushioda / SeaPics.com	Q. How far do some adult green turtles migrate to get to their nesting site? <i>A. 2,250 kilometres</i>
 ARKIVE www.arkive.org © Masa Ushioda / SeaPics.com	Q. Name a threat you face as an adult turtle. <i>A. Being caught in a fishing net, being hunted for food, being eaten by a shark</i>	 ARKIVE www.arkive.org © Masa Ushioda / SeaPics.com	Q. When do you usually go onto the beach to lay your eggs? <i>A. At night</i>
 ARKIVE www.arkive.org © Masa Ushioda / SeaPics.com	Q. Where do adult turtles mate? <i>A. In the sea, just off the shore of the nesting beach where they hatched</i>	 ARKIVE www.arkive.org © Masa Ushioda / SeaPics.com	Q. What is your status on the IUCN Red List? <i>A. Endangered</i>
