

Now think about using some of the other *senses*:

- What might it feel like?
- What might it smell like?
- What might it sound like?

For example:

Nouns	Adjectives
1. rocks	grey tall craggy sharp rounded lifeless slimy
2. clouds	white grey wispy thin silver soft
3.	
4.	
5.	
6.	
7.	
8.	
9.	
10.	
11.	
12.	
13.	
15.	

Challenge 1: Now use the **adjectives** you have thought of and have a look in a thesaurus or just type *alternative word for xxxxx* (insert your word here) online to find some other words that are similar. These are called **synonyms**.

For example: *Rocks could be described as tall.*

When I looked in my thesaurus (a book that gives you alternative words), I found some more alternative words (synonyms) that I could use to describe the rocks.
